

CURRICULUM VITAE

PERSONAL DETAILS

Surname: Kamoto
First Name: Tamanda
Initial: Jenifer
Date of Birth: 02nd February, 2006
Nationality: Malawian
Sex: Female
Marital Status: Single

CONTACT DETAILS

Contact Address: Tamanda Kamoto, Malawi University of Business and Applied Sciences, P.O Box 303, Chichiri.
Cell: +265(0) 888 316 909 / 996 691 259
Email: tamandakamoto18@gmail.com
Home of Origin: Blantyre, Malawi

EDUCATION

Institution	Date	Qualification Obtained	Modules Covered
Bangwe Day Secondary School	2016–2021	Malawi School Certificate of Education	

LANGUAGES

Language	Speaking	Reading	Writing
English	Excellent	Excellent	Excellent
Chichewa	Excellent	Excellent	Excellent

WORK EXPERIENCE

1. Employer: ELECTRICITY SUPPLY CORPORATION OF MALAWI (ESCOM)

Position: Electrical Maintenance Trainee

During this period, the following works were carried out and this resulted in gaining more skills and understanding more about how certain components and equipment work:

1. Verifying Signals: Measure physical parameters and cross-reference against raw PLC registers, scale settings, and HMI readings.

2. Comparing Signals: Analyze targeted values against redundant sensors, adjacent channels, or historian trends to spot drift, offset, or high-frequency noise.

- 3. Troubleshooting Faults:** Isolate root causes across power supply voltages, I/O channel hardware alarms, or network protocol communication errors.
- 4. Tracing Wiring:** Perform continuity tests, check shield grounding at a single end, and inspect terminal connections and wire tags against schematics.
- 5. Simulating Signals:** Inject known currents or switch states using a calibrated source to test PLC and SCADA response independently of field sensors.
- 6. Testing Signals:** Evaluate dynamic performance, signal stability under load, loop impedance, and step-response timing.
- 7. Fixing Faults:** Replace damaged field devices or I/O modules, repair wiring terminals, re-calibrate zero/span, and clear latching fault codes.
- 8. Wiring Signals:** Crimp wire ferrules, land conductors to designated terminal blocks at correct torque specs, and maintain proper IS/non-IS separation.
- 9. Console Maintenance:** Clear inactive alarm buffers, rebind HMI tags, optimize historian database logging rates, and clean control room workstations.
- 10. SCADA Equipment Maintenance:** Servicing server hardware, testing UPS battery banks, cleaning enclosure air filters, checking network switch traffic, and backing up PLC binaries

OTHER SKILLS AND ABILITIES

- Ability to lead and supervise other workers during the carrying out of duties
- Ability to take initiative and make decisions
- Proficient computer user including Microsoft Office among others
- Calmness under pressure and the ability to work to strict deadlines
- Facilitation of Trainings
- Excellent in Community engagement and living in rural setting

OTHER ATTRIBUTES

- Hardworking
- Result Oriented
- Team Player
- Development Conscious
- Fast Learner
